EXAMINER'S AMENDMENT/COMMENT/REASONS FOR ALLOWANCE

The Examiner hereby withdraws the holding abandonment pursuant to the notice of abandonment mailed on as 3/23/2009 as unwarranted under the rules governing post-board decision practice. See 37 CFR 1.197 and 1.198.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The Board of Patent Appeals and Interferences affirmed the rejection(s) against Claims 1-3, 21-23, but reversed all rejections against claims 5 and 7.

The application has been amended as follows in accordance with MPEP § 1214.06:

Cancel claims 1-3, 21-23.

The information disclosure statements filed on 6/29/2009, 6/19/2009, 8/6/2008 and 5/16/08 fails to comply with the provisions of 37 CFR 1.97, 1.98, 1.198 and MPEP § 609 because they were filed after decision by the Board of Appeals. They have been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

While the present application was up on appeal, US Patent 7,179,152 was issued which claims subject matter that is not patentably distinct from the claims of the present application. Claims 1-22 of said patent disclose and/or suggest a composition containing a base cream having suspended therein 30%-75% by weight of the composition of a plurality of abrasive particles of corundum having an average particle size of about 100 to about 556 micrometers which can contain a vitamin, mineral, an antioxidant, a cleanser and/or an emulsifier, which overlaps the subject matter claimed by claims 5, 7 of the present application which claims a cream base having suspended therein at least 35% by weight of the composition of a plurality of particles of corundum having an average particle size of 34 to 124 microns which can contain a vitamin, mineral, an antioxidant, a cleanser and/or an emulsifier. One of ordinary skill in the art would have been motivated to modify the claims of said patent as indicated with the expectation that the same would suitable for application to the skin and removing hair from or smoothing a callus on the skin of a hand or foot or a human subject without damaging the skin. Therefore, the claimed invention, as a whole, would have been an obvious modification of the claims of said US Patent to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of claims of said cited US Patent.

In view of the above, a terminal disclaimer was filed on 7/13/2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 7,179,152 has been reviewed and is accepted. The terminal disclaimer has been recorded.
